DETAILED ACTION

Claim Objections

1. Claims 13-24 are objected to because of the following informalities: claim 13, line 15, after "threshold", "to generate a corrected wireless signal" should be inserted so as to provide antecedent basis for subsequent recitation in line 16. Claim 19, line 8, "scanned" should be replaced by "sampled" to follow similar amendment made to the claim in the latest applicant's response. Claim 19, line 4, "the digital signal" should be replaced by "said/the digital signal" so as to make use of antecedent in line 1; line 13, after "threshold", "to output a corrected modulated OFDM signal " should be inserted so as to provide antecedent basis for subsequent recitation in claim 21, lines 2-3; lines 14-15 should be replaced by "a pre-equalizer to pre-equalize the corrected modulated OFDM signal " to follow the correction made to line 13; line 15, after "signal", "to output a pre-equalized corrected modulated OFDM signal " should be inserted to provide proper antecedent basis for subsequent recitation in line 16; line 16, "corrected pre-equalized " should be inserted before "modulated". Note that any claim whose base claim is objected is likewise objected. Appropriate correction is required.

Specification

2. The disclosure is objected to because of the following informalities: page 10, lines 7 and 8 of the substitute specification, "scan" and "overscanning" should be replaced by "sample" and "oversampling" to follow similar amendment made to the

Art Unit: 2611

specification in the latest applicant's response. Note that the specification must be carefully reviewed for the occurrence of such terms and/or similar terms.

Appropriate correction is required.

Conclusion

3. This application is in condition for allowance except for the formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

4. Claims 13-24 would be allowable if amended to overcome the objection set forth above.

5. The following is a statement of reasons for the indication of allowable subject matter: as argued by applicant at page 11, lines 6, Brajal and the admitted prior art (background of the invention) do not teach or fairly suggest in combination or taken singularly, "subtracting a correction signal from a wireless signal **after providing the correction signal with the phase of the wireless signal**", as recited in claims 13 and 19 and therefore are allowable.

6. The substitute specification filed on 7/24/02 has been entered.

Drawings

7. The drawings were received on 5/10/07. These drawings are acceptable.

Response to Arguments

8. Applicant's arguments, see page 11, lines 6-23, filed 5/10/07, with respect to the rejection of claims 13 and 19 have been fully considered and are persuasive. The rejection of claims 13 and 19 and the dependent claims has been withdrawn.

Priority

9. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). However, the claim for foreign priority is denied for failure to include specific reference in the specification "**during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application**".

10. If applicant desires to claim the benefit of a prior-filed application under 35 U.S.C. 119(e), a specific reference to the prior-filed application in compliance with 37 CFR 1.78(a) must be included in the first sentence(s) of the specification following the title or in an application data sheet. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications.

If the instant application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference must be submitted during

Art Unit: 2611

the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. **If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.**

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.
